ADRC name: \_\_\_\_\_ Participant ID: \_\_\_\_\_ Form date: \_\_\_\_ / \_\_\_\_ / \_\_\_\_

Visit #: \_\_\_\_\_ Examiner's initials: \_\_\_\_\_

**INSTRUCTIONS:** This form should be completed by a clinician with experience in performing a comprehensive neurologic examination, assessing the presence/absence of neurological signs, and rating the degree of any abnormalities. Additionally, the clinician should have experience in completing each of the assessment measures associated with the gateway questions if any key neurologic findings are present. For additional clarification and examples, see UDS Coding Guidebook for Initial Visit Packet, Form B8.

Check only one box per question.

**Section 2D – Additional Measures**

There are several additional clinical measures to consider for completion depending on the findings and the suspicion of the clinical syndrome; these include, but are not limited to, the following:

a ) If there are any features of a movement disorder (e.g., bradykinesia, tremor, rigidity, postural instability, etc.):

**Consider completing Form B3 UPDRS, or the MDS-UPDRS**

b ) If there are any features of ALS (e.g., upper motor neuron dysfunction and/or lower motor neuron dysfunction):

**Consider completing the ALSFRS-R**

c ) If there are any features of PSP- Richardson's syndrome (e.g., parkinsonism, postural instability, supranuclear gaze palsy, etc.):

**Consider completing the PSPRS**

d ) If there are any features of corticobasal syndrome (e.g., limb rigidity, limb apraxia, myoclonus, dystonia, cortical sensory loss, alien limb phenomenon, etc.):

**Consider completing the PSPRS and/or the CBFS**

e ) If there are any features of complex visual processing dysfunction (e.g. hemineglect, visual agnosia, simultanagnosia, optic ataxia, ocular apraxia, apraxia of eyelid opening, etc.):

**Consider completing a standardized measure assessing PCA**

f ) If there are any features of aphasia or apraxia of speech (e.g., NIH Stroke Scale, Progressive Aphasia Severity Scale, Western Aphasia Battery, etc.):

**Consider completing a standardized measure assessing speech and language**

g ) If there are clinical and/or imaging findings suggesting a vascular contribution to the clinical presentation:

**Consider completing NIH Stroke Scale, Hachinski Ischemic Scale, etc.**
